Diner

Notes

Housed in the iconic building, designed in 1926 by architect and Detroit native, Robert Finn, this hotel is a uniquely distinctive property. Featuring 106 guest rooms, food & beverage spaces, 2 retail shops, a rooftop with panoramic views, spread across 55,000 square feet.

Inspired by the old-world hotels traditionally found in the Motor City, this hotel has been re-interpreted in a contemporary way. ASH NYC preserved much of the buildings original features, incorporating them into the reimagined space, including: the travertine floors, plaster detailing on the ceilings, and original terracotta signs. The hotel also features warm and clean aesthetic decor, custom & vintage furniture, design pieces, and works sourced from designers based in Detroit and worldwide.
