 CATEGORIES

Beach House, House

Notes

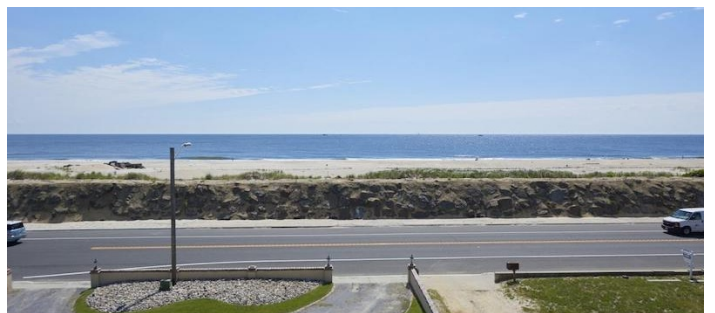

4000 square feet of pure 90's bliss. Three floor, extremely well built single family home is situated between the Shrewsbury River and the Atlantic Ocean.

The master suite is the entire top level with amazing views and a giant master bathroom with more pink marble and cherry wood that one could never imagine. The middle floor is an open layout. The kitchen looks out onto the ocean with a beautiful deck. There are two bedrooms and a jack and jill bathroom. There is a massive deck off the sunken living room that affords the best views of both the river and the ocean.

The bottom floor has a 3 car garage, full gym and a kitchen and full bath that services the pool.

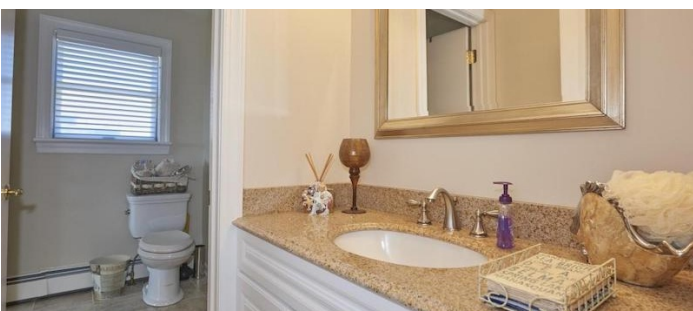

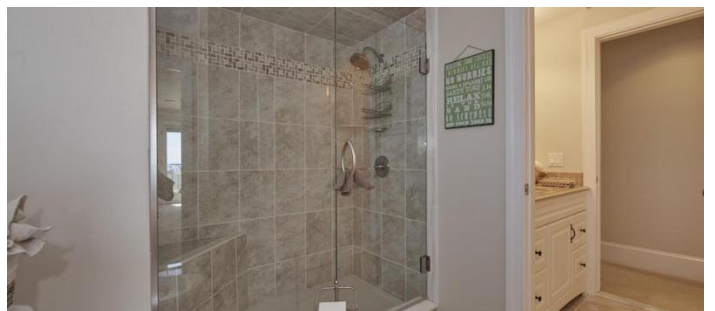

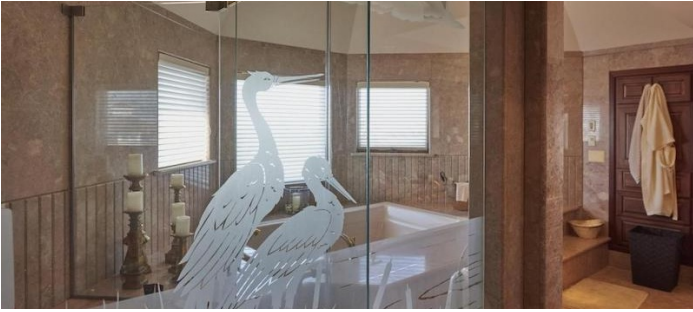

The house is on a private street, has parking for 12 cars and has a whole house generator.

There is a deep water dock nearby on the Shrewsbury river. The docks layout is grandfathered so its very wide.

DOCK PIER
