Notes

Located in a Hamilton Heights landmarked turn-of-the century Beaux-Arts building. This 1,650 square foot 2nd floor apartment has ten foot ceilings, original moldings, French Doors, wainscoting and much light. As the apartment has not been renovated, it would work well for a period or classic NYC setting. A full drum set and amps are available for use. From the master bedroom, there is a view of Elisabeth Catlett's "Invisible Man" sculpture. There is also a view of the river during the Winter/Spring.

The building itself has a history of film and TV shoots. The building has a large lobby with a grand stairwell and a roof with panoramic views of the city. There is an elevator (including a freight elevator). These can be used through arrangement with the management company who is amenable to film/tv shoots in the building.
